

Infant Bosco M

Salem, India | boscoinfant18@gmail.com | +91 9384200824

LinkedIn: <https://linkedin.com/in/infant-bosco/>

GitHub: <https://github.com/InfantBosco>

Professional Summary

First-year Computer Science & Engineering student with experience building and deploying full-stack web applications using React, Flask, and PostgreSQL. Interested in software engineering, product development, API integration, and scalable web systems.

Education

B.Tech – Computer Science & Engineering | Karunya Institute of Science and Technology, Coimbatore

2025 – 2029 (Expected)

CGPA: 8.84

Technical Skills

- **Languages:** Python, C, JavaScript, HTML5, CSS3
- **Frontend:** React.js, Tailwind CSS, Recharts
- **Backend:** Flask, REST APIs, JWT Authentication
- **Databases:** PostgreSQL, SQLite
- **Tools:** Git, GitHub, Postman, VS Code
- **Deployment:** Vercel, Render, Cloudinary

Projects

VibeCodePro – Chrome Extension for Code Correction

HTML · CSS · Json

GitHub: https://github.com/InfantBosco/extension_code/tree/main/extension_bt

LinkedIn :

https://www.linkedin.com/posts/infant-bosco-967085378_python-chromeextension-studentproject-ugcPost-7454656995304976384-ocB7/?utm_source=share&utm_medium=member_desktop&rcm=ACoAAF1Fbx8BhBko9vv4bO2GxdUI19QKIuY7Ik

- VibeCode Pro helps users clean copied code from websites, chats and online platforms.
- It fixes common beginner-level formatting and syntax issues such as smart quotes, broken print statements, missing colons, spacing issues and accidental characters.
- Json handles the logical things required.

MaternCare – Maternal Health Risk Analyzer

React · Flask · Recharts · Python

GitHub: <https://github.com/InfantBosco/moter-foetal> Live Demo: <https://materncare.vercel.app/>

- Built an interactive health risk assessment dashboard with real-time visualization and risk scoring.
- Designed an accessible UI using Recharts for multi-metric health data display.
- Connected React frontend with Flask backend for health parameter processing and risk classification.

Concert'26 – 3D Animated Website

HTML5 · CSS · JavaScript · JSON

GitHub: <https://github.com/InfantBosco/raja-concert>

Live Demo: <https://raja-concert.vercel.app/>

- Developed a 3d based Animated Website for a real-world case with visually appealing animations, frameworks and bootstraps
- Implemented real-time 3d animated website and deployed it using vercel .
Explored Frameworks and Bootstraps in depth

SPS - Full stack website for a School (ongoing)

React · FlaskAPI · MongoDB · Vercel · Railways

GitHub: <https://github.com/InfantBosco/sps-anti>

- Developing a Full Stack Website for a school with premium frontend design
And also backend integration
- Implementing 43 webpage and Database works are on now

Leadership & Responsibilities

- **Team Lead – Academic Web Projects:** Coordinated project teams for frontend, backend, and database development using GitHub collaboration workflows.
- **Documentation & Project Management:** Maintained README files, API references, and database schema documentation for smoother onboarding.

Learning & Development

- Self-directed study in REST API design, PostgreSQL database modeling, and cloud deployment.
- Familiar with Agile-style iterative development workflows.
- Continuously improving full-stack development and software engineering skills through personal projects.

Additional Information

- Languages: English (Professional), Tamil (Native)
- Interests: Open-source development, product design, software architecture
- Entrepreneurial interest in campus-focused software and AI-based tools
